

Field Force Management Software

Empower Your Field Force, Elevate Your Efficiency
Seamless Management with **CURATOR**

About Field Force Management Software

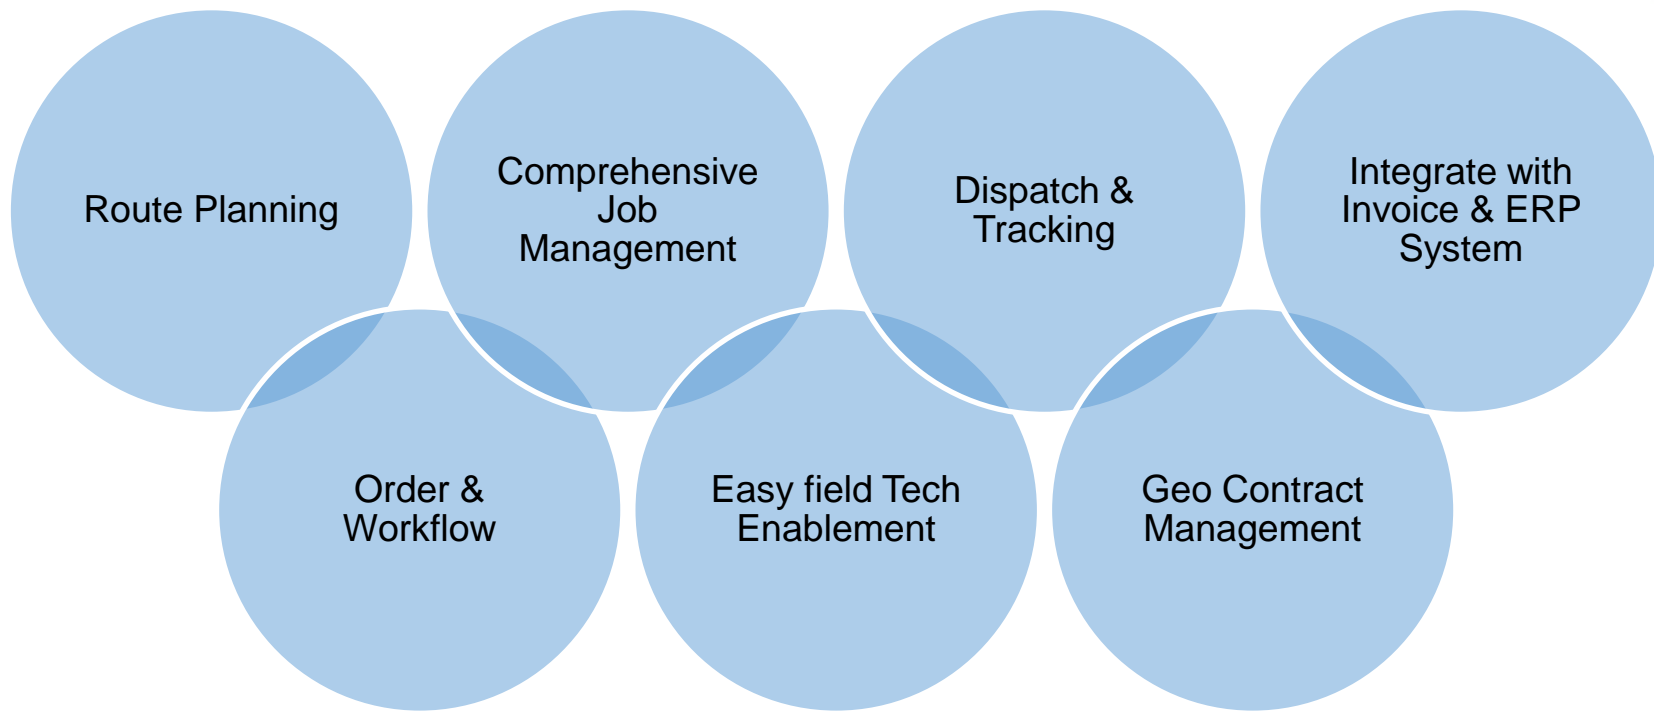

Curator-Field force management software streamlines and optimizes the management of mobile or field-based teams by offering tools for scheduling, tracking, and coordinating field activities. It enhances efficiency by facilitating route planning, real-time location tracking, task allocation, and performance analysis, ultimately improving productivity and customer service.

Challenges of manual monitoring the field force

- Time Consuming
- Limited Accuracy
- Lack of Security
- Difficulty in Real-Time Tracking
- Limited Visibility and Reporting
- Lack of Consistency
- Scalability Issues

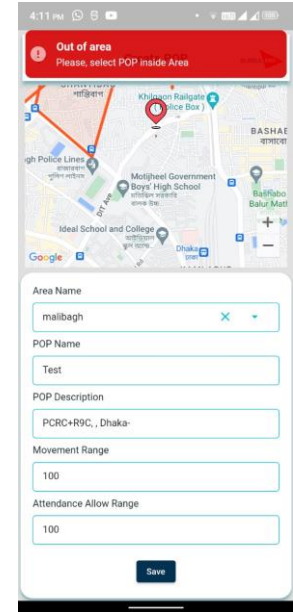

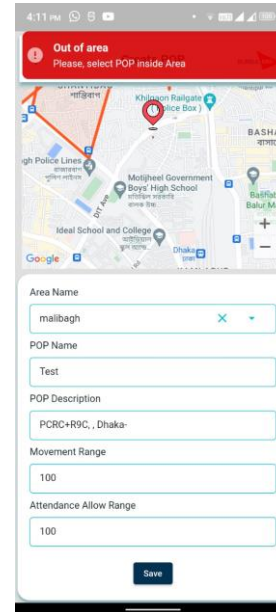

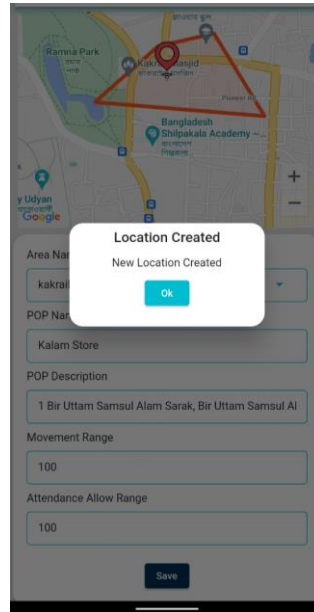

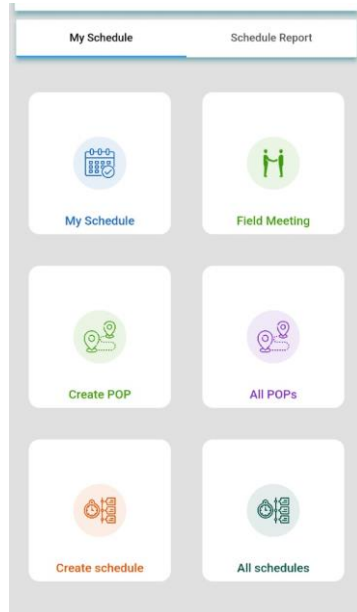

Solutions Overview

Software features

- **GPS Tracking:** Provides real-time location tracking of field employees, allowing managers to monitor their movements and optimize routes.
- **Visit Scheduling and Optimization:** Helps in planning and scheduling visits efficiently, taking into account factors like location, availability, and priority.
- **Route Planning and Navigation:** Offers tools to create optimal routes for field visits, reducing travel time and expenses.
- **Check-In/Check-Out:** Allows employees to check in and out of locations, providing timestamps and details of their visits.
- **Reporting and Analytics:** Generates reports on employee activities, travel time, distances covered, and visit outcomes for performance evaluation and decision-making.
- **Mobile Access and Integration:** Supports mobile applications for field employees to access schedules, update visit statuses, and communicate with the office. Integration with other software like CRM or ERP systems might be essential.
